# Simply a better choice

For a superior interior finish to your home, Gyprock Superchek™ is tougher, quieter and a better choice for the environment.

Plasterboard is used as a wall and ceiling lining material in all modern homes and the quality of the plasterboard that your builder uses can have a dramatic impact on the quality of your home.

If you care about high quality and environmental sustainability, Gyprock Superchek™ is your ideal choice for a quieter, more durable and sustainable prestige home.

Your builder may have already included Superchek™ in your new home. If not, just ask and you'll be pleasantly surprised at how little it can cost to upgrade.

## One plasterboard, three amazing benefits

Gyprock Superchek™ is a premium plasterboard manufactured with a denser core and heavy duty facing material. These qualities combined with a special plaster formulation featuring high levels of recycled material make the board tougher, quieter and greener.

### Tougher

**Better resistance to dents and scrapes from things such as furniture and school bags.**

Compared with standard plasterboard, Gyprock Superchek™ requires double the force to impose a discernable surface indentation.

### Quieter

**Better sound absorption and less noise transfer for a quieter, more comfortable home.**

Superchek™ provides a 15% reduction in perceived loudness compared to standard plasterboard. When installed in ceilings of multi-storey homes, Superchek™ can also reduce noise levels between floors.

## Greener

Recognised by Good Environmental Choice Australia as a better environmental product for walls and ceilings.

Gyproc Superchek™ in your home can give you greater environmental peace of mind and the prestige of longer lifecycle durability.

## A better Environmental Choice

Good Environmental Choice Australia (GECA) is internationally recognised as Australia's leading certifying body for sustainable products.

In certifying products, GECA places a particular emphasis on the efficient use of resources, the fitness for purpose of the product and the use of non-hazardous materials.

Gyproc Superchek™ is manufactured with a high level of recycled material that would otherwise require disposal in landfill. Also, the product is designed to have a durability in use that exceeds conventional plasterboard lining products.

## CSR Gyprock™ Warranty

Gyprock™ products are manufactured for life with all CSR products designed to achieve optimal performance when part of a CSR integrated system. Gyprock™ continues to lead the market with premium quality products which are the preferred choice of plastering professionals. Gyprock™ plasterboard products are manufactured to the Australian Standards AS2588 providing confidence in quality of product and support.
